## TASKS

### Task# 01:

Given a weighted digraph (directed graph), find the least-cost path from a given source to a given destination with exactly m edges. Let source = 0, destination = 3, number of edges (m) = 4. The graph has 3 routes from source 0 to destination 3 with 4 edges. 0—1—5—2—3 having cost 17, 0—1—6—5—3 having cost 19, 0—6—5—2—3 having cost 8. The solution should return the least cost, i.e., 8.

**Task # 02:** Write a program to solve the 8-puzzle problem using the DFS and BFS search algorithm

Initial  
configuration

1	2	3
5	6	
7	8	4

Final  
configuration

1	2	3
5	8	6
	7	4
